

Remember Earth Day - April 22<sup>nd</sup>!

## Bamboo Shirts

Bamboo is known to be the fastest growing plant on earth. It is a naturally renewable, eco-friendly product that is easy on our environment, thriving naturally without the use of harmful pesticides. A bamboo forest releases 35% more oxygen than an equivalent size forest. Every strand of bamboo fiber boasts a luxurious soft hand, elegant sheen and durability while keeping you cooler than cotton.

### Men's and Ladies Bamboo Long Sleeve Shirt

- 70% rayon (from bamboo)/30% cotton
- Available in Sand, Light Blue, Deep Blue (pictured), Ivory, Black Silk, Lime Sherbet
- Call for more information on custom decorating options and quantity pricing

## Soybean Shirts

Soy protein fiber offers a number of great properties for both the wearer and the environment. It is a renewable natural resource that is biodegradable and eco-friendly. Soybean protein fiber has an incredibly soft hand, natural loft and soft drape combined with washability and durability.

### Men's and Ladies Sport Soybean Cotton Knit Top

- 52% cotton/43% azlon (protein from soybean)/5% spandex
- Men's Available in Natural, Dark Chestnut (pictured), Siesta Blue, Black and Night
- Ladies Available in Natural, Dark Chestnut, Surf Spray (pictured), and Black
- Call for more information on custom decorating options and quantity pricing

## Recycled Polyester Fabrics

Recycled polyester fabrics feature yarns made from post-consumer products. This helps to reduce the amount of waste in landfills, decreases energy consumption, and conserves petroleum resources used in the production of virgin polyester. Additionally, these recycled polyester knits are made with a special cross-section of polyester yarns engineered to provide a high performance wicking function which absorbs and rapidly disperses moisture to the fabric surface, thereby helping to keep the skin dry and fresh.
